

PRE-ANAESTHETIC BLOOD TESTING CONSENT FORM FOR DOGS

Does your pet need any other treatments?	
Vaccinations – Basic – R440.00	Yes / No
Microchip – R380.00	Yes / No
Any other concerns? @	

Please read carefully before signing below.

At Bakenkop Animal Clinic, our greatest concern is the wellbeing of your pet. Your pet is scheduled for anaesthesia and/or surgery.

Before general anaesthesia, we perform a full physical examination. We recommend a pre-anaesthetic blood profile to maximize patient safety and alert the doctor to the presence of diabetes, kidney or liver disease which could complicate the procedure.

These conditions may go undetected without a pre-anaesthetic blood test. These tests are similar to those a physician would run if you were to undergo anaesthesia. In addition, the results of these tests will be useful for your pet's future health checks and aid in diagnosis and treatment.

- Healthy patients, basic test:** **COST: R1050**
Includes: Basic kidney and liver tests, blood sugar, protein levels, full blood count, urine and faecal tests.
- Geriatric or Sick patients(>7years)** **COST: R1550**
Includes all the above tests as well as: Advanced kidney and liver, electrolytes, calcium and pancreatic tests.

Please select one of the following, mark your choice and sign
<input type="checkbox"/> Please complete the recommended blood work prior to surgery/ anaesthesia on my pet. If abnormalities are found, please contact me on the phone number below. I understand that there are always potential risks when using anaesthesia or performing surgery on an animal. Signature: _____ Owner's Name: _____ Pet Name: _____
<input type="checkbox"/> I have elected to decline the recommended pre-anaesthetic blood work at this time and request that you proceed with anaesthesia. I understand that there are always potential risks when using anaesthesia or performing surgery on an animal. Signature: _____ Owner's Name: _____ Pet Name: _____
